

## Product Notice 2020-1325

Date: September 18, 2020

Re: BNY Mellon ETF Trust

MEMX LLC (“MEMX or the “Exchange”) was approved by the Securities and Exchange Commission as a registered national securities exchange on May 4, 2020. MEMX intends to commence trading and other operations in September of 2020. This Product Notice is being issued to advise you that the following securities have been approved for trading pursuant to unlisted trading privileges (“UTP”) on MEMX as UTP Derivative Securities pursuant to MEMX Rule 14.1.

<b><u>Securities (the “Fund” or the “ETF”)</u></b>	<b><u>Symbol</u></b>
BNY Mellon Emerging Markets Equity ETF	BKEM
BNY Mellon International Equity ETF	BKIE
BNY Mellon Short Duration Corporate Bond ETF	BKSB
BNY Mellon High Yield Beta ETF	BKHY
BNY Mellon Core Bond ETF	BKAG

Issuer/Trust: BNY Mellon ETF Trust

Issuer/Trust Website: <https://www.bnymellon.com/us/en/home.jsp>

Primary Listing Exchange: NYSE Arca

Compliance and supervisory personnel should note that, among other things, this Product Notice discusses the need to deliver a prospectus to customers purchasing shares of the exchange-traded fund. Please forward this Product Notice to interested persons within your organization.

The purpose of this Product Notice is to outline various rules and policies that will be applicable to trading in these new products pursuant to the Exchange’s unlisted trading privileges, as well as to provide certain characteristics and features of the securities. For a more complete description of the Issuer, the securities, and the underlying market instruments or indexes, visit the Issuer Website, consult the Prospectus available on the Issuer Website or examine the Issuer Registration Statement, or review the most current information bulletin issued by the Primary Listing Exchange. The Issuer Website, the Prospectus and the Issuer Registration Statement are hereafter collectively referred to as the “Issuer Disclosure Materials.”

### **Background Information on the Funds**

BNY Mellon Emerging Markets Equity ETF (BKEM): The fund seeks to track the performance of the Morningstar® Emerging Markets Large Cap Index.

The Morningstar® Emerging Markets Large Cap Index<sup>SM</sup> is a float-adjusted market capitalization weighted index designed to measure the performance of emerging market large-capitalization stocks. A country is considered emerging if: (i) its annual per capita gross national income does not fall in the World Bank’s high-income category for the most recent three years; (ii) it has had broad-based discriminatory controls

against non-domiciled investors during the most recent three years; and (iii) its stock markets do not exhibit any of the following characteristics: transparency, market regulation, operational efficiency, and the absence of broad-based investment restrictions. The index's initial universe of eligible securities includes equity securities (including common stock, preferred stock and shares of real estate investment trusts (REITs)), issued by emerging market companies and traded on a major foreign exchange. At each reconstitution, the initial universe is screened to exclude securities based on the number of non-trading days, trading volume and turnover during the preceding six-month period, and market capitalization. Securities not previously part of the last reconstitution are excluded from a current reconstitution if the security has 20 or more non-trading days during the last six months or their trading volume and turnover ranks in the bottom 25% of the initial universe as determined by the index provider based on the preceding six months of trade data. Securities previously part of the last reconstitution are provided a one-time buffer and not excluded unless the security has 30 or more non-trading days (20 or more non-trading days after the one-time buffer) during the last six months or their trading volume and turnover ranks in the bottom 20% (bottom 25% after the one-time buffer) of the initial universe as determined by the index provider based on the preceding six months of trade data. Of the remaining securities, the index includes large capitalization securities from each eligible country, targeting the top 70% of stocks by market capitalization from each eligible country. The index rebalances quarterly in March, June, September and December, and reconstitutes semi-annually in June and December. As of December 31, 2019, the index was comprised of 524 securities.

Under normal circumstances, in seeking to track the index's performance, the fund generally purchases a representative sample of the securities comprising the index. By using a sampling process, the fund typically will not invest in all of the securities in the index. The fund may also fully replicate the index when determined to be in the best interest of the fund in pursuing its objective.

In seeking to track the index, the fund's assets may be concentrated in (i.e., more than 25% of the fund's assets invested in) an industry or group of industries, but only to the extent that the index concentrates in a particular industry or group of industries. In addition, a significant portion of the

BNY Mellon International Equity ETF (BKIE): The fund seeks to track the performance of the Morningstar® Developed Markets ex-US Large Cap Index.

The Morningstar® Developed Markets ex-US Large Cap Index<sup>SM</sup> is a float-adjusted market capitalization weighted index designed to measure the performance of developed market (excluding the United States) large-capitalization stocks. A country is considered developed if it meets the following criteria: (i) its annual per capita gross national income falls in the World Bank's high-income category for the most recent three years; (ii) it has not had any broad-based discriminatory controls against non-domiciled investors for the most recent three years; and (iii) its stock markets exhibit the following characteristics: transparency, market regulation, operational efficiency, and the absence of broad-based investment restrictions. The index's initial universe of eligible securities includes equity securities (including common stock, preferred stock and shares of real estate investment trusts (REITs)), issued by developed market companies (excluding the United States) and traded on a major foreign exchange. At each reconstitution, the initial universe is screened to exclude securities based on the number of non-trading days, trading volume and turnover during the preceding six-month period, and market capitalization. Securities not previously part of the last reconstitution are excluded from a current reconstitution if the security has 20 or more non-trading days during the last six months or their trading volume and turnover ranks in the

bottom 25% of the initial universe as determined by the index provider based on the preceding six months of trade data. Securities previously part of the last reconstitution are provided a one-time buffer and not excluded unless the security has 30 or more non-trading days (20 or more non-trading days after the one-time buffer) during the last six months or their trading volume and turnover ranks in the bottom 20% (bottom 25% after the one-time buffer) of the initial universe as determined by the index provider based on the preceding six months of trade data. Of the remaining securities, the index includes large capitalization securities from each eligible country, targeting the top 70% of stocks by market capitalization from each eligible country. The index rebalances quarterly in March, June, September and December, and reconstitutes semi-annually in June and December. As of December 31, 2019, the index was comprised of 672 securities.

Under normal circumstances, the fund generally invests in all of the stocks in the index in proportion to their weighting in the index. However, the fund may invest in a representative sample of the index if replicating the index could be detrimental or disadvantageous to shareholders, such as when there are practical difficulties or substantial costs involved in compiling a portfolio of equity securities to replicate the index, in instances in which a security in the index becomes temporarily illiquid, unavailable or less liquid, or as a result of legal restrictions or limitations (such as tax diversification requirements) that apply to the fund but not the index.

In seeking to track the index, the fund's assets may be concentrated in (i.e., more than 25% of the fund's assets invested in) an industry or group of industries, but only to the extent that the index concentrates in a particular industry or group of industries. In addition, a significant portion of the fund's assets will generally be focused in a country or region to the extent the index is focused in a particular country or region.

**BNY Mellon Short Duration Corporate Bond ETF (BKSB):** The fund seeks to track the performance of the Bloomberg Barclays US Corporate 1-5 Years Total Return Index.

The Bloomberg Barclays US Corporate 1-5 Years Total Return Index is designed to measure the market for investment grade, U.S. dollar-denominated, fixed-rate, taxable corporate bonds with one to five years left to maturity. To be included in the index, securities must have \$300 million or more par amount outstanding and be rated investment grade (Baa3/BBB-/BBB- or higher) using the middle rating of Moody's, S&P and Fitch. When a rating from only two agencies is available, the lower is used; when only one agency rates a bond, that rating is used. In cases where explicit bond level ratings may not be available, the index provider may use other sources to classify securities by credit quality. The index may include U.S. dollar-denominated bonds issued by foreign issuers. Securities in the index are updated on the last business day of each month. The fund seeks to maintain a dollar-weighted average maturity consistent with that of the index. As of December 31, 2019, the index was comprised of approximately 2,200 securities and had a dollar-weighted average maturity of 2.8 years.

Under normal circumstances, in seeking to track the index's performance, the fund generally purchases a representative sample of the securities comprising the index. By using a sampling process, the fund typically will not invest in all of the securities in the index. The fund may also fully replicate the index when determined to be in the best interest of the fund in pursuing its objective.

In seeking to track the index, the fund's assets may be concentrated in (i.e., more than 25% of the fund's assets invested in) an industry or group of industries, but only to the extent that the index concentrates in a particular industry or group of industries.

BNY Mellon High Yield Beta ETF (BKHY): The fund seeks to track the performance of the Bloomberg Barclays US Corporate High Yield Total Return Index.

The Bloomberg Barclays US Corporate High Yield Total Return Index is designed to measure the U.S. dollar-denominated, high yield (junk), fixed-rate, taxable corporate bond market. Bonds included in the index must have \$150 million or more par amount outstanding and at least one year until final maturity. Bonds are classified as high yield if the middle rating of Moody's, Fitch and S&P is Ba1/BB+/BB+ or below. When a rating from only two agencies is available, the lower is used; when only one agency rates a bond, that rating is used. In cases where explicit bond level ratings may not be available, the index provider may use other sources to classify securities by credit quality. The index may include U.S. dollar-denominated bonds issued by foreign issuers. Securities in the index are updated on the last business day of each month. The fund seeks to maintain a dollar-weighted average maturity consistent with that of the index. As of December 31, 2019, the index was comprised of approximately 1,900 securities and had a dollar-weighted average maturity of 5.8 years.

Under normal circumstances, in seeking to track the index's performance, the fund generally purchases a representative sample of the securities comprising the index. By using a sampling process, the fund typically will not invest in all of the securities in the index. The fund may also fully replicate the index when determined to be in the best interest of the fund in pursuing its objective.

In seeking to track the index, the fund's assets may be concentrated in (i.e., more than 25% of the fund's assets invested in) an industry or group of industries, but only to the extent that the index concentrates in a particular industry or group of industries.

BNY Mellon Core Bond ETF (BKAG): The fund seeks to track the performance of the Bloomberg Barclays US Aggregate Total Return Index.

The Bloomberg Barclays US Aggregate Total Return Index is designed to measure the investment grade, U.S. dollar-denominated, fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate securities, mortgage-backed pass-through securities (agency fixed-rate), commercial mortgage-backed securities (agency and non-agency) and other asset-backed securities having at least one year until final maturity. Treasury, government-related and corporate securities must have \$300 million or more par amount outstanding. For mortgage-backed passthrough securities, pool aggregates must have \$1 billion or more par amount outstanding. Assetbacked securities must have a minimum deal size of \$500 million and a minimum tranche size of \$25 million. Commercial mortgage-backed securities must have a minimum deal size of \$500 million with at least \$300 million outstanding and a minimum tranche size of \$25 million. To be included in the index, securities must be rated investment grade (Baa3/BBB-/BBB- or higher) using the middle rating of Moody's, S&P and Fitch. When a rating from only two agencies is available, the lower is used; when only one agency rates a bond, that rating is used. In cases where explicit bond level ratings may not be available, the index provider may use other sources to classify securities by credit quality. The index may include U.S. dollar-denominated bonds issued by foreign issuers. Securities in the index are updated on the last business day of each month. The

fund seeks to maintain a dollar-weighted average maturity consistent with that of the index. As of December 31, 2019, the index was comprised of approximately 11,000 securities and had a dollar-weighted average maturity of 8 years.

Under normal circumstances, in seeking to track the index's performance, the fund generally purchases a representative sample of the securities comprising the index. By using a sampling process, the fund typically will not invest in all of the securities in the index. The fund may also fully replicate the index when determined to be in the best interest of the fund in pursuing its objective.

In seeking to track the index, the fund's assets may be concentrated in (i.e., more than 25% of the fund's assets invested in) an industry or group of industries, but only to the extent that the index concentrates in a particular industry or group of industries.

For more information regarding each Fund's investment strategy, please read the Trust's prospectus for the Funds.

As described more fully in the Issuer's prospectus and Statement of Additional Information, each Fund will issue and redeem Shares on a continuous basis at their net asset value ("NAV"). Each Fund will issue or redeem shares that have been aggregated into blocks of shares and or multiples thereof ("Creation Units") to authorized participants who have entered into agreements with the Funds' distributor. The Funds generally will issue or redeem Creation Units in return for a designated portfolio of securities (and an amount of cash) that the Funds specify each day.

Shares are held in book-entry form, which means that no share certificates are issued. The Depository Trust Company or its nominee is the record owner of all outstanding Shares and is recognized as the owner of all Shares for all purposes.

The NAV of each Fund is generally determined as of the close of trading (normally 4:00 p.m., Eastern Time) on each day the New York Stock Exchange is open for business. The NAV of the Fund is calculated by dividing the value of the net assets of the Fund (i.e., the value of its total assets less total liabilities) by the total number of outstanding shares of the Fund, generally rounded to the nearest cent.

#### **Purchases and Redemptions in Creation Unit Size**

MEMX Members are hereby informed that procedures for purchases and redemptions of Shares in Creation Units are described in the Trust's Prospectus and SAI and that Shares are not individually redeemable but are redeemable only in Creation Unit aggregations or multiples thereof.

#### **Principal Risks**

Interested persons are referred to the Funds' Registration Statement for a description of risks associated with an investment in each Fund. These may include, but are not limited to, equity investing risk, asset class risk, concentration risk, industry/sector risk, issuer risk, liquidity risk, index risk, market risk, asset class risk, interest rate risk, tax risk and valuation risk.

In addition, the market prices of the Shares will fluctuate in accordance with changes in NAV as well as the supply and demand for the Shares. As a result, the Shares may trade at market prices that may differ from their NAV. The NAV of the Shares of each Fund will fluctuate with changes in the market value of such Fund's holdings.

### **Exchange Rules Applicable to Trading in the Shares**

Trading in the Shares on MEMX is subject to MEMX trading rules.

### **Trading Hours**

The value of the Index underlying the Shares will be disseminated to data vendors every 15 seconds during the Regular Trading Session.

The Shares will trade on MEMX between 7:00 a.m. and 8:00 p.m. Please note that trading in the Shares during the Exchange's Pre-Market and Post-Market Sessions ("Extended Market Sessions") may result in additional trading risks which include: (1) that the current underlying indicative value may not be updated during the Extended Market Sessions, (2) lower liquidity in the Extended Market Sessions may impact pricing, (3) higher volatility in the Extended Market Sessions may impact pricing, (4) wider spreads may occur in the Extended Markets Sessions, and (5) because the indicative value is not calculated or widely disseminated during the Extended Market Sessions, an investor who is unable to calculate an implied value for the Shares in those sessions may be at a disadvantage to market professionals.

### **Delivery of a Prospectus**

Exchange Members should be mindful of applicable prospectus delivery requirements under the federal securities laws with respect to transactions in the Fund. Prospectuses may be obtained through the Fund's website. The Prospectus for the Fund does not contain all of the information set forth in the Funds Registration Statement (including the exhibits to the Registration Statement), parts of which have been omitted in accordance with the rules and regulations of the SEC. For further information about the Fund, please refer to its Registration Statement.

In the event that the Fund relies upon an order by the SEC exempting the Shares from certain prospectus delivery requirements under Section 24(d) of the 1940 Act and in the future make available a written product description, Exchange Rules require that Exchange Members provide to all purchasers of Shares a written description of the terms and characteristics of such securities, in a form prepared by the Issuer of the Fund, no later than the time a confirmation of the first transaction in the Shares is delivered to such purchaser. In addition, Exchange Members shall include such a written description with any sales material relating to the Shares that is provided to customers or the public. Any other written materials provided by a MEMX member to customers or the public making specific reference to the Shares as an investment vehicle must include a statement in substantially the following form: "A circular describing the terms and characteristics of [the UTP Derivative Securities] has been prepared by the [open-ended management investment company name] and is available from your broker. It is recommended that you obtain and review such circular before purchasing [the UTP Derivative Securities]."

An Exchange member carrying an omnibus account for a non-member broker-dealer is required to inform such non-member that execution of an order to purchase Shares for such omnibus account will be deemed to constitute agreement by the non-member to make such written description available to its customers on the same terms as are directly applicable to such Exchange member under this rule. Upon request of a customer, Exchange Members also shall provide a copy of the Prospectus.

### **Suitability**

Trading in the securities on the Exchange will be subject to the provisions of MEMX Rule 3.7 and other applicable suitability rules. Members recommending transactions in the securities to customers should make a determination that the recommendation is suitable for the customer.

### **Trading Halts**

The Exchange will halt trading in the Shares of a security in accordance with the Exchange's Rules. The grounds for a halt include a halt because the intraday indicative value of the security and/or the value of its underlying index are not being disseminated as required, a halt for other regulatory reasons or due to other conditions or circumstances deemed to be detrimental to the maintenance of a free and orderly market.

### **Exemptive, Interpretive and No-Action Relief Under Federal Securities Regulations**

The Securities and Exchange Commission (the "SEC") has issued letters granting exemptive, interpretive and no-action relief from certain provisions of rules under the Securities Exchange Act of 1934 for exchange-traded securities listed and traded on a registered national securities exchange that meet certain criteria.

AS WHAT FOLLOWS IS ONLY A SUMMARY OF THE RELIEF OUTLINED IN THE NO-ACTION LETTERS REFERENCED ABOVE, THE EXCHANGE ADVISES INTERESTED PARTIES TO CONSULT THE NO-ACTION LETTERS FOR MORE COMPLETE INFORMATION REGARDING THE MATTERS COVERED THEREIN AND THE APPLICABILITY OF THE RELIEF GRANTED IN RESPECT OF TRADING IN SECURITIES. INTERESTED PARTIES SHOULD ALSO CONSULT THEIR PROFESSIONAL ADVISORS.

### **Regulation M Exemptions**

Generally, Rules 101 and 102 of Regulation M prohibit any "distribution participant" and its "affiliated purchasers" from bidding for, purchasing, or attempting to induce any person to bid for or purchase any security which is the subject of a distribution until after the applicable restricted period, except as specifically permitted in Regulation M. The provisions of the Rules apply to underwriters, prospective underwriters, brokers, dealers, and other persons who have agreed to participate or are participating in a distribution of securities.

The SEC has granted an exemption from Rule 101 under Regulation M to permit persons participating in a distribution of Shares of the above-mentioned Fund to engage in secondary market transactions in such Shares during their participation in such a distribution. In addition, the SEC has granted relief under Regulation M to permit persons who may be deemed to be participating in the distribution of Shares of

the above-mentioned Fund (i) to purchase securities for the purpose of purchasing Creation Unit Aggregations of Fund Shares and (ii) to tender securities for redemption in Creation Unit Aggregations. Further, the SEC has clarified that the tender of Fund Shares to the Fund for redemption does not constitute a bid for or purchase of any of the Funds' securities during the restricted period of Rule 101. The SEC has also granted an exemption pursuant to paragraph (e) of Rule 102 under Regulation M to allow the redemption of Fund Shares in Creation Unit Aggregations during the continuous offering of Shares.

**Rule 10b-10 (Customer Confirmations for Creation or Redemption of Fund Shares)**

Broker-dealers who handle purchases or redemptions of Fund Shares in Creation Unit size for customers will be permitted to provide such customers with a statement of the number of Creation Unit Aggregations created or redeemed without providing a statement of the identity, number and price of Shares of the individual securities tendered to the Fund for purposes of purchasing Creation Unit Aggregations ("Deposit Securities") or the identity, number and price of Shares to be delivered by the Trust for the Fund to the redeeming holder ("Redemption Securities"). The composition of the securities required to be tendered to the Fund for creation purposes and of the securities to be delivered on redemption will be disseminated each business day and will be applicable to requests for creations or redemption, as the case may be, on that day. This exemptive relief under Rule 10b-10 with respect to creations and redemption is subject to the following conditions:

- 1) Confirmations to customers engaging in creations or redemptions must state that all information required by Rule 10b-10 will be provided upon request;
- 2) Any such request by a customer for information required by Rule 10b-10 will be filed in a timely manner, in accordance with Rule 10b-10(c); and
- 3) Except for the identity, number, and price of Shares of the component securities of the Deposit Securities and Redemption Securities, as described above, confirmations to customers must disclose all other information required by Rule 10b-10(a).

**Section 11(d)(1); Rules 11d1-1 and 11d1-2**

Section 11(d)(1) of the Act generally prohibits a person who is both a broker and a dealer from effecting any transaction in which the broker-dealer extends credit to a customer on any security which was part of a new issue in the distribution of which he participated as a member of a selling syndicate or group within thirty days prior to such transaction. The SEC has clarified that Section 11(d)(1) does not apply to broker-dealers that are not Authorized Participants (and, therefore, do not create Creation Unit Aggregations) that engage in both proprietary and customer transactions in Shares of a Fund in the secondary market, and for broker-dealer Authorized Participants that engage in creations of Creation Unit Aggregations. This relief is subject to specific conditions, including the condition that such broker-dealer (whether or not an Authorized Participant) does not, directly or indirectly, receive from the Fund complex any payment, compensation or other economic incentive to promote or sell the Shares of a Fund to persons outside the fund complex, other than non-cash compensation permitted under NASD Rule 2830(l)(5)(A), (B) or (C). (See letter from Catherine McGuire, Chief Counsel, SEC Division of Market Regulation, to Securities Industry Association, Derivative Products Committee, dated November 21, 2005.) The SEC also has taken a no-action position under Section 11(d)(1) of the Act that broker-dealers may treat Shares of a Fund, for purposes of Rule 11d1-2, as "securities issued by a registered open-end investment company as defined in the Investment Company Act" and thereby extend credit or maintain

or arrange for the extension or maintenance of credit on Shares that have been owned by the persons to whom credit is provided for more than 30 days, in reliance on the exemption contained in the rule.

#### **Rule 14e-5**

An exemption from Rule 14e-5 has been granted to permit any person acting as a dealer-manager of a tender offer for a component security of the Fund (1) to redeem Fund Shares in Creation Unit Aggregations from the issuer that may include a security subject to such tender offer and (2) to purchase Fund Shares during such tender offer. In addition, a no-action position has been taken under Rule 14e-5 if a broker-dealer acting as a dealer-manager of a tender offer for a security of the Fund purchases or arranges to purchase such securities in the secondary market for the purpose of tendering such securities to purchase one or more Creation Unit Aggregations of Shares, if made in conformance with the following:

- 1) such bids or purchases are effected in the ordinary course of business, in connection with a basket of 20 or more securities in which any security that is the subject of a distribution, or any reference security, does not comprise more than 5% of the value of the basket purchase; or
- 2) purchases are effected as adjustments to such basket in the ordinary course of business as a result of a change in the composition of the underlying index; and
- 3) such bids or purchases are not effected for the purpose of facilitating such tender offer.

#### **SEC Rule 15c1-5 and 15c1-6**

The SEC has taken a no-action position with respect to Rule 15c1-5 and Rule 15c1-6 as to the required disclosure of control by a broker or dealer with respect to creations and redemptions of Fund Shares and secondary market transactions therein. (See letter from Catherine McGuire, Chief Counsel, SEC Division of Market Regulation, to Securities Industry Association, Derivative Products Committee, dated November 21, 2005.)

**This Product Notice is not a statutory prospectus. Members should consult the Prospectus for a security and the security's website for relevant information.**
