

Product Notice 2020-1358

Date: October 27, 2020

Re: UBS Notes

Pursuant to the Rules of MEMX LLC (“MEMX or the “Exchange”), this Product Notice is being issued to advise you that the following securities have been approved for trading pursuant to unlisted trading privileges (“UTP”) on the Exchange as UTP Derivative Securities pursuant to MEMX Rule 14.1.

<u>Security (the “Notes” or the “ETNs”)</u>	<u>Symbol</u>
UBS AG Exchange Traded Access Securities (E-TRACS) Linked to the Wells Fargo® Business Development Company Index due April 26, 2041	BDCS

Issuer/Trust: UBS

Primary Listing Exchange: NYSE Arca

The purpose of this Product Notice is to outline various rules and policies that will be applicable to trading in these new products pursuant to the Exchange’s unlisted trading privileges, as well as to provide certain characteristics and features of the Notes.

Background Information on the Notes

Each Note is the unsecured obligation of a financial institution that provides for the payment at maturity of a cash amount based on the performance of an index or other reference asset (e.g. commodities, currencies or other financial instruments or benchmarks).

Each Note’s underlying index name, IIV symbol and website are set forth below:

<u>Underlying Index</u>	<u>IIV Symbol</u>	<u>Website</u>
Wells Fargo Business Development Company Index	BDCS.IV	www.etracs.ubs.com

Each Note’s Registration Statement and pricing supplement provide a description of the Note, including information about payment at maturity, redemption features, fees and dividends. For a more complete description of each Note and its underlying index, see the Note’s Registration Statement and pricing supplement and its website.

Investment Risks

Interested persons are referred to each Note’s Registration Statement for a description of risks associated with an investment in that Note. Investing in a Note involves a number of risks not associated with an investment in conventional debt securities. An investment in a Note involves significant risks and is not appropriate for every investor. Investing in a Note is not equivalent to investing directly in the index

underlying such Note. Accordingly, a Note should be purchased only by knowledgeable investors who understand the terms of the investment and are familiar with the behavior of the underlying index and financial markets generally. The Notes are riskier than ordinary unsecured debt securities.

Risks associated with an investment in a Note may include, but are not limited to, issuer creditworthiness; loss of all or a substantial portion of an investment in such Note; no guaranteed minimum payment at maturity or call, or upon acceleration or early redemption, no payment of interest or any coupon amount; risks associated with the applicable index or reference asset; acceleration and redemption, resulting in a loss of all or a substantial portion of an investment; and restriction on the minimum number of Notes that may be redeemed and on the procedures and timing for early redemption.

Exchange Rules Applicable to Trading in the Notes

Trading in the ETNs on MEMX is subject to MEMX trading rules.

Trading Hours

The ETNs will trade on MEMX between 7:00 am and 5:00 pm (EST). Please note that trading in the ETNs during the Exchange's Pre-Market and Post-Market Sessions ("Extended Market Sessions") may result in additional trading risks which include: (1) that the current underlying indicative value may not be updated during the Extended Market Sessions, (2) lower liquidity in the Extended Market Sessions may impact pricing, (3) higher volatility in the Extended Market Sessions may impact pricing, (4) wider spreads may occur in the Extended Markets Sessions, and (5) because the indicative value is not calculated or widely disseminated during the Extended Market Sessions, an investor who is unable to calculate an implied value for the Notes in those sessions may be at a disadvantage to market professionals.

Suitability

Trading in the securities on the Exchange will be subject to MEMX Rule 3.7 and other applicable suitability rules. Members recommending transactions in the securities to customers should make a determination that the recommendation is suitable for the customer.

Trading Halts

The Exchange will halt trading in the ETNs in accordance with the Exchange's Rules. The grounds for a halt include a halt because the intraday indicative value of the security and/or the value of its underlying index are not being disseminated as required, a halt for other regulatory reasons or due to other conditions or circumstances deemed to be detrimental to the maintenance of a free and orderly market.

This Product Notice is not a statutory prospectus. Members should consult the Prospectus for a security and the security's website for relevant information.

Please contact MEMX Regulation at regulation@memx.com with any inquiries regarding this Product Notice.
